

*Downtown streetscape in 1999*

*Proposed streetscape enhancements*

*Partially implemented downtown streetscape (2006)*

*Completed downtown streetscape project (2009)*

Parkersburg has participated in the Community Visioning Program two times, in 1998-99 and again in 2009. In 2008, the community was struck by an EF5 tornado, which destroyed a half-mile wide section of the town along the Highway 57/14 corridor, including tree planting that resulted from participation in visioning. However, improvements made to the downtown business district were not affected.
