## What is Community Visioning?

The Iowa's Living Roadways Community Visioning Program is a planning and design program of the Living Roadway Trust Fund, Trees Forever, and Iowa State University Landscape Architecture Extension. It encourages proactive public involvement in visionary and strategic thinking about landscape improvements.

The participating community leaders and volunteers, guided by a Trees Forever Field Coordinator and a landscape architect:

- assess local natural, cultural and aesthetic landscape resources
- identify community needs
- develop a community concept plan
- determine potential funding sources
- initiate the first phase of landscape development.

Through the program the community plans roadside enhancements, integrates environmental stewardship as a positive ingredient for community improvement, and benefits from the services of design professional.
