Proposed East Entry Signage Enhancements

Existing West Entry Signage

Proposed West Entry Signage Enhancements

Proposed Welcome Center Sign and Plantings

Program Overview

Entry signage is often the first visual impression a visitor receives of a community. It is important that these thresholds reflect positively on the town. The welcome center sign is still the original temporary one. The visioning committee would like a permanent replacement as suggested by the design team.

The design team recommends a prairie planting heavy in wildflowers around the Nashua monument sign at the north entrance on State Highway 346. In addition, the team recommends a backdrop planting and groundcover bed for the existing sign on State Highway 346 at the west entrance to town. Trees Forever could be a funding source for this planting.
